Muhammad Ammar Janjuha

Date of birth: 10 May 2003 | **Nationality:** Pakistani | **Phone number:** (+92) 3233528139 (Mobile) | **Email address:** ammarjanjuha92@gmail.com | **Linkedin:** https://www.linkedin.com/in/muhammad-ammar-janjuha/ | **Github:** https://github.com/Ammar-Janjuha | **Address:** Islamabad, Pakistan (Home)

ABOUT ME

I am a recent Computer Science graduate from Capital University of Science and Technology, with a strong foundational interest in Cybersecurity, DevOps, SOC operations, and Software Quality Assurance (SQA).

I completed a six-week internship at Overroots, where I assisted in vulnerability scanning and learned to write clean, maintainable code. Currently, I am actively expanding my practical knowledge through self-directed learning in areas such as CI/CD pipelines (GitHub Actions), containerization (Docker), and test automation (Selenium).

I have also built academic projects including a Hotel Management System and an RFID-based animal tracking system, which strengthened my skills in scripting, data structures, and system design. I am now seeking an entry-level role or internship where I can contribute to meaningful projects, learn alongside experienced professionals, and grow into a well-rounded security and operations professional. I am deeply committed to continuous improvement, attention to detail, and teamwork.

I am seeking for an entry-level role where I can apply my technical abilities, contribute to meaningful projects, and grow under the guidance of experienced professionals.

WORK EXPERIENCE

CYBER SECURITY INTERN – OVERROOT – 29 Jul 2024 – 9 Sep 2024 – ISLAMABAD, PAKISTAN

I completed a rigorous six-week program that provided an in-depth exploration of cybersecurity and software development, with a focus on vulnerability scanning, Flutter development, and web support.
Key Achievements
Cybersecurity Expertise: Acquired a strong understanding of cybersecurity tools and concepts. I gained practical experience in vulnerability scanning and analysis, enhancing my ability to identify and address security threats effectively.
Flutter Development Skills: learn Flutter for cross-platform development, enabling the creation of mobile and web applications. Applied software architecture and design principles to build robust and scalable solutions.
Coding Best Practices: emphasized the importance of coding standards, including proper naming conventions and state management. Focused on producing clean, efficient, and maintainable code with a strong emphasis on testing and debugging.

EDUCATION AND TRAINING

1 AUG 2021 – 20 FEB 2026 Islamabad, Pakistan
BACHELOR'S OF COMPUTER SCIENCE Capital University of Science and Technology, Islamabad

Website https://cust.edu.pk/ | **Final grade** 2.52/4.00

1 JUL 2019 – 30 AUG 2021 Talagang, Pakistan
FSC IN PRE ENGINEERING Fauji Foundation Inter College Talagang

Field of study Pre Engineering | **Final grade** C

1 MAY 2017 – 30 JUN 2019 Talagang, Pakistan
METRIC IN COMPUTER SCIENCE Fauji Foundation Inter College Talagang

Field of study Computer Science | **Final grade** A+

PROJECTS

1 NOV 2025 – 19 JAN 2026

MapReduce (Word Count) Using Parallel Programming

Implemented a parallel word counting system using the MapReduce programming model in a distributed computing environment. The project focused on processing large text datasets by dividing input into smaller chunks and distributing them across multiple worker nodes. The map phase transformed text into intermediate key-value pairs, the shuffle phase grouped values by key, and the reduce phase aggregated word frequencies to produce final counts. The system was designed with a master node responsible for task coordination and worker nodes executing parallel map and reduce operations. Performance was evaluated by comparing serial and parallel implementations, demonstrating significant speedup and scalability.

Implantable RFID Chip for Animal Identification and Data Tracking

Designed and proposed a system for animal and human identification using implantable RFID chip technology. The project focuses on developing a non-invasive, efficient, and accurate method for tracking and identifying animals in environments such as zoos, pet homes, animal parks, and prisons. The system integrates an RFID chip implantation module, an RFID reader interface using Raspberry Pi and RDM6300 module, and a centralized data management system for storing and retrieving animal information including age, health records, species, and origin. Python was used for backend development, with libraries such as pyserial and rdm6300 enabling communication with the RFID reader. The system automatically detects new RFID chips, prompts users to assign unique identifiers, and maintains a CSV-based database for persistent storage.

Hotel Managemnet System (Double Link List)

Developed a console-based Hotel Management System in C++ using a doubly linked list data structure to efficiently manage room allocations, guest information, and billing. The system allows users to allocate different types of rooms (Family and VIP), display allocated room details, calculate bills based on room rates and duration of stay, search for specific rooms, update guest information, and delete room records. Key functionalities include first allot, after allot, before allot, and last allot operations to insert guest records at various positions in the linked list. The program ensures data integrity through input validation, tracks room availability in real-time, and calculates total revenue generated from allocated rooms.

SKILLS

Basic programming C, C++ | Python Language - Basic knowledge | Web development (HTML/CSS, JavaScript) | Database Managemnet | Object Oriented Analysis | Teamwork | Interpersonal Skills | Software Engineering Skill | Object Oriented Programming | Object Oriented Design

LANGUAGE SKILLS

Mother tongue(s): **PANJABI; PUNJABI** | **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

HONOURS AND AWARDS

8 JUL 2023

Google Cyber Security – Google

VOLUNTEERING

17 JUL 2023 – 6 AUG 2023 Al-Khidmat Foundation, Talagang Pakistan

Al-Khidmat Foundation

During my volunteer service at Al-Khidmat Foundation, I contributed 65 hours in the MEAL (Monitoring, Evaluation, Accountability, and Learning) department, where I meticulously managed data entry, created detailed MS Excel spreadsheets, and maintained reports to support the organization's operational efficiency. This role sharpened my technical skills in data management and analysis while deepening my understanding of humanitarian logistics. By assisting in documentation for flood relief planning and coordinating with team members, I reinforced my commitment to community service and gained firsthand insight into the critical behind-the-scenes work that drives impactful social initiatives. The experience not only strengthened my organizational abilities but also highlighted the importance of precision and teamwork in advancing healthcare and disaster response efforts for vulnerable communities.
